Each Flower is a country.
The petal represent various indicators.
Height of the flower depends on primary indicator (aggregate)
Hover over a petal to produce a popup of components of that indicator ⟶

Imports	
Raw Materials	26%
Grain	18%
Cars	12%
Textiles	9%
⋮	

Country 1 — Indicator A, Indicator B, Indicator C, Indicator D, Indicator E, Indicator F

HDI (relative)

Country 2

HDI (relative)

Difference in HDI between Country 1 & Country 2

Dynamic Dashboard:
We have lots of data. Interesting extension is to let user choose the petals and construct a dynamic aggregate based on chosen petals.

☑ PPP

☑ Job Security

☐ Access to Resources

All chosen categories are shown as a petal.

Dynamic aggregate is generated.
